PROJECT REPORT ON

"HealthIt – Health Tracking App"

Submitted in partial fulfillment of the requirements for Enterprise Computing Project Lab for 3rd Semester

Master of Computer Applications (MCA)

Submitted by

Ms. Diya Thomas 24MCAA22

Mr. Alfin Jose 24MCAA06

Under the guidance of

Mr. Tomin Joseph

Kristu Jayanti College
AUTONOMOUS Bengaluru
Reaccredited 'A++' Grade by NAAC | Affiliated to Bengaluru North University

This is to certify that the project titled ***"HealthIt – Health Tracking App"*** has been satisfactorily completed by **Mr. Alfin Jose** with **24MCAA06,** in partial fulfillment of the requirements for ***Enterprise Computing Project*** with course code **MCC2P2B31,** for the 3rd Semester MCA course during the academic semester from July 2025 to November 2025 as prescribed by Bangalore North University.

Faculty In-charge **Head of the Department**

Valued by

Examiner 1:_____ Date:

Examiner 2:_____ Centre: Kristu Jayanti College

ACKNOWLEDGEMENT

First of all, we would like to thank the God Almighty for all the blessings he has showered on us. Our spiritual quotient gave us more strength and motivation that helped immensely.

We would like to thank **Rev. Fr. Dr. Augustine George,** our Principal, for providing us his constant guidance and support. I would also like to thank **Rev. Fr. Dr. Lijo P Thomas,** our Vice - Principal and Chief Finance Officer, for providing us with the best facilities.

We are extremely thankful to our Head of the Department **Dr. Muruganantham A** for his enormous guidance and motivation and also giving us the essential support in the form of allocating comfortable lab hours and necessary resources.

We would like to extend our heartfelt thanks to **Mr. Tomin Joseph**, our project guide for providing us the necessary details related to project development and process identification enabling us to finish the project within the stipulated time.

We thank all other faculty members who helped us a lot in completing this project. The computer lab was always open for us. We thank the lab administrator and other technical staff for their help and support.

We thank our class mates, who have pointed out errors and guided us a lot and we thank each and every one who has helped us.

ABSTRACT

This project introduces a cross-platform habit tracking application meticulously engineered to empower users in seamlessly monitoring and maintaining their daily routines. Developed using React Native alongside Expo, the application achieves streamlined development, rapid prototyping, and uniform deployment on both iOS and Android devices, guaranteeing a consistent and responsive user experience regardless of the operating system. The backend leverages Supabase, a cloud-native solution providing robust real-time database management, secure user authentication, and encrypted cloud storage—ensuring all user data remains synchronized, protected, and accessible from any device. Through an intuitive, visually engaging interface, users can easily create, edit, and track habits, while clear progress visualizations and insightful feedback support motivation and adherence to long-term positive routines. The architecture's tight coupling between the frontend and Supabase's powerful API enables instantaneous data updates and a seamless sync experience, even as users switch devices, add new habits, or check off daily achievements. With these integrated modern technologies, the system delivers scalable and reliable performance, supports rapid feature evolution, and upholds stringent privacy standards—ultimately offering an accessible, comprehensive, and user-friendly platform designed to foster sustainable habit formation and enduring well-being in everyday life.
